

## Usability Test: **FreeTime Application**

Fall, 2020

CS 262 Team D

### **Permission**

We will take notes during this usability test. We will not use your name, and after use, we will discard any notes. While in our possession, the notes will remain private and used exclusively for our reference. Do we have your permission to take notes on this interaction?

### **Introduction**

Thank you for volunteering in this usability test for the in-progress application FreeTime. Our team is interested in seeing first hand what it is like for real users to try out our service. We will use this information to augment the user experience.

We intend to test the app, not you. So there are no wrong moves here. We ask you to be honest about your thoughts on the app, as well as any comments or suggestions you may have. Through this, we can most effectively optimize usability and fix issues.

For the test, we have you perform a set of tasks. While doing so, we encourage that you think out loud; comments and questions are welcome. If you desire to quit the usability test, you are welcome to do so at any point.

### **Background Questions**

Have you ever been a leader of a group that had to organize schedules? If yes, how did you accomplish this?

Before beginning the test, do you have any questions for us?

## The Test

### 1. Create an account

1. **Sign up** - When the app launches, create an account, and remember your credentials. We ask that you use a meaningless password to protect your privacy. **Do not use one of your common passwords for this test.**
2. **Log In** - Enter your credentials on the login page.

### 2. Initial Reactions - After logging in, you enter the Homepage. What are your thoughts and initial reactions? Any comments on the homepage interface?

### 3. General tasks - I will prompt you on some tasks to complete, time permitting:

1. **Entering Free-time** - Enter a free-time on Monday from 7:15 AM to 8:45 AM, another free-time on Saturday from 5:00 PM to 6:30 PM.
2. **Deleting Free-time**
  1. **Single Day** - Delete your entered free-times from Monday.
  2. **Entire Week** - Delete your entered free-times for the entire week.
3. **Setting Interests** - Select interests "Volleyball", "Movies" and "Backpacking" on your profile.
4. **Creating a group** - Create two groups with different names.
5. **Renaming a group** - Rename one of the groups you created.
6. **Deleting a group** - Delete one of the groups you created.

### 4. Final Observations - After testing out our application's current features, what are your thoughts or recommendations? What changes would you make? What did you like and dislike? Would you use our app, why or why not?

## **Thanks**

Thank you for your time and willingness to help us test our application. It is still in the development phase, so your input is appreciated.

We will contact you with a basic summary of our findings, as well as how we plan to proceed. We will hold onto the data from this session for our use only and will keep it private.
